

SonoBiometry

What is it?

- Semi-automatic measurement of head (circumference & bi-parietal diameter), abdomen, and femur

Why use it?

- Addresses the need for standardization; helps provide consistent measurements
- Integrates easily into workflow
- Helps clinicians achieve reproducible results to support their clinical decision making
- Exam type – OB exams

Tips

- Ensure standard markers are present for recognition – midline falx and thalami in head; stomach, and spine in abdomen
